

**WASHINGTON, DC** - U.S. Rep. Michael A. Arcuri (NY-24) issued the following statement calling on the FCC to put forward an immediate plan of action regarding the radio tower in the Town of Floyd that may be emitting harmful radiation causing health problems for local residents.

"It is unacceptable that the FCC has taken this long to respond to the requests of so many to investigate the radio tower in Floyd. If it is the tower that is causing the disturbing health concerns for the residents in its vicinity, there is no time to waste in remedying this issue and I will continue to pressure the FCC for action. If this delay continues, it will be necessary to hold public hearings and call on other government agencies to become involved in an issue that could be handled by the FCC merely conducting a standard test."
